

40 Mitchell Ave, Binghamton, NY 13903 Phone:(607) 723-1676

Patient Name: Christopher Tallant
Height: 5.11

MRN #: 7573
Weight: 250

Birth Year:
Hypertension: S1

Blood Pressure Averages

Blood Pressure Averages: Weekly

Week	Systolic(n)	Diastolic(n)	Pulse(n)
11-03-2024	131 (1)	86 (1)	85 (1)
07-21-2024	126 (1)	85 (1)	87 (1)

Blood Pressure Averages: Monthly

Month-Year	Systolic(n)	Diastolic(n)	Pulse(n)
10-2024	126 (1)	85 (1)	87 (1)
9-2024	121 (1)	81 (1)	82 (1)
8-2024	123 (1)	81 (1)	79 (1)
7-2024	125 (5)	84 (5)	71 (5)

Blood Pressure Averages: Quarterly

Quarter-Year	Systolic(n)	Diastolic(n)	Pulse(n)
10-2024	126 (1)	85 (1)	87 (1)
7-2024	122 (2)	81 (2)	80 (2)
7-2023	125 (5)	84 (5)	71 (5)
4-2023	0 (0)	0 (0)	0 (0)
1-2023	0 (0)	0 (0)	0 (0)

Blood Pressure Averages: Yearly

Year	Systolic(n)	Diastolic(n)	Pulse(n)
2024	126 (1)	85 (1)	87 (1)
2023	124 (7)	83 (7)	73 (7)
2022	130 (18)	85 (18)	84 (18)
2021	135 (70)	86 (70)	85 (70)
2020	145 (2)	86 (2)	85 (2)

Blood Sugar Averages

Week	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
11-09-2024	134(2)	144(2)		163(1)	107(3)		

Month-Year	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
11-2024	134(2)	144(2)		163(1)	107(3)		
10-2024	135(1)				127(1)		
09-2024		168(1)	133(1)				
08-2024	144(2)				135(3)		

Year	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
01-01-2024	145(10)	152(3)	134(3)	164(2)	122(8)	116(1)	
01-01-2023	132(1)	164(4)	175(3)	184(1)		150(5)

null Sue Ward	Christopher Tallant	Medicare open enrollment has begun and will continue through December 7th. Please be aware that we do NOT participate with all Medicare Advantage plans!! If you choose a plan that we do not participate in, we will not be able to continue seeing you as our patient. As always, we require you to present your insurance card & copay at every visit, so remember to bring the new card if you change. These are the Medicare Advantage plans we participate with: AARP Medicare Aetna Medicare BCBS/Excellus Medicare CDPHP Medicare Cigna/MVP Medicare Humana Medicare Medicare/Medicare Railroad United Healthcare Medicare United Health care Dual Complete If you have any questions, please contact our office at 607-723-1676. We have sent a similar message through the patient portal as well. No response back through the checkmyvitals app is needed. Hope to see you all next year DCA providers and staff	11-11-2024
R.A. Ramanujan, M.D.	Christopher Tallant	Please contact Amy, She will discuss about data uploading options. Best	10-11-2024
Christopher Tallant	R.A. Ramanujan, M.D.	got them, no co pay. installed and setup. is there a way to share with you? app has options	10-11-2024
R.A. Ramanujan, M.D.	Christopher Tallant	👍👏	09-11-2024
Christopher Tallant	R.A. Ramanujan, M.D.	so I went to the gym Friday for the first time in years. jogged for two miles, stair machine for 20 minutes. now I'm sore of course. But, I just started having my left arm tingle. no other issues. heart rate yesterday and respirations actually great during the activity. I feel fine otherwise. cause for concern or just likely nerves pinching from activity?	09-11-2024

Systolic Variability Trends

1. CV – The coefficient of variation (CV) is the ratio of the standard deviation to the mean. The higher the coefficient of variation, the greater the level of dispersion around the mean, Units = mmHg.

2. ARV – Average real variability (ARV) is a method for measuring short-term, reading-to-reading, within-subject variability. It is defined as the average of the absolute differences between consecutive readings, Units = mmHg.

3. SD – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean), Units = mmHg.

Diastolic Variability Trends

Kalman Trends

1. Mean(Arithmetic Mean) – Mean is the average of a set of numbers

2. SD – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean).

3. V- Variance determines the spread of numbers.. It measures how far each number in the set is from the mean (average) and from every other number in the set.

PSR

PSR: Pulse stiffening ratio (PSR) is the ratio between systolic and diastolic stiffness. It can be expressed as $PSR = \frac{[systolic\ stiffness]}{[diastolic\ stiffness]}$.

HbA1c Trends

Estimated HbA1c - eHbA1c

Others Trends

- 1. MAP:PP Ratio**- Mean Arterial Pressure : Pulse Pressure Ratio
- 2. HASI**- Home arterial stiffening index
- 3. HSASI**- Home Symmetric arterial stiffening index
- 4. PP**- Pulse Pressure
- 5. WIF or widening factor number.** $WIF = K - 1 / \ln(K) - 1$, where K is the variability ratio ($K = \text{Systolic Std. Dev} / \text{Diastolic Std. Dev}$)
- 6. eIPP**- Elastic component of pulse pressure. $eIPP = (PP - stPP)$
- 7. stPP**- Stiffening component of pulse pressure. $stPP = PP / (1 + WIF)$

eCO graph

eCO (Estimated Cardiac Output) Normal range to be added 5 – 10 liters/minute

Units of eCO (Estimated Cardiac Output) – liters/minute

eCBP graph

eCBP (Estimated Central Blood Pressure) normal range – 0 – 100 mmHg

1. Cardiac output scale is in liters/minute. Normal range at rest is 5-6 liters/min and (with activity goes up to 30 -35 liters/min)

2. Central mean BP is Squared, Mean radial artery BP/diastolic BP in mmHg. Scale in mmHg and the scale Should be between 0-50 50-100, 150 and 200 mmHg. No established normal at the moment.

MAP graph

MAP -Mean arterial blood pressure. $MAP = \text{Diastolic blood pressure} + 1/3(\text{Systolic blood pressure} - \text{Diastolic blood pressure})$

Reference & Abbreviations

Guide to abbreviations and blood pressure, pulse and other Metrics.

HBPM -Home blood pressure measurement.	HBS -Home blood sugar
PP -Pulse pressure	AP -Average pulse
BPV -Blood pressure variability	SV -Systolic variability
DV -Diastolic variability	PV -Pulse variability
ARV -Average real variability	CV -Coefficient of variation %
SD -Standard deviation	MAP -Mean arterial blood pressure
MAP: PP Mean Arterial Pressure : Pulse Pressure	HASI -Home arterial stiffness index
HSASI -Home Symmetric arterial stiffness index	Estimated CO -Cardiac output [CO=(PPxHR)x.002]
PSR Pulse stiffening ratio. (PSR = SBP/DBP or slope of systolic BP/slope of diastolic BP)	

Estimated central blood pressure ECBP (ECBP = brachial MBP2/brachial DBP or ECBP = radial MBP2/radial DBP)

Normal Ranges.

Systolic BP 110 – 120 mm Hg

Diastolic BP 70 – 80 mmHg

Pulse 60 - 100/min

Pulse pressure (PP) 40 mmHg (Low PP less than 25% of the systolic BP and high PP greater than 100 mm Hg)

Normal stroke volume (SV) 60 -100 ml

Cardiac output (CO) SV x pulse rate/min

Estimate Cardiac output = Stroke volume / m

Blood pressure variability; Not defined in USA. But desirable ranges ESH guidelines; Systolic day time BP less than 15 mmHg and Diastolic less than 7.9 mmHg and Weighted SD less than 12.8 mmHg for systolic

Definitions.

MAP:PP ratio not defined.

Pulse stiffening ration; Not defined. Pulse pressure * inverse log (std. dev. systolic / std. dev. Diastolic) / (std. dev. systolic / std. dev. Diastolic) - 1 (Pulse pressure X ln (K)/(K-1) where K is systolic Sd /diastolic SD.)

Home arterial stiffness index; Not defined

Home arterial symmetric arterial index: Not defined.

Central blood pressure:Not defined
