

40 Mitchell Ave, Binghamton, NY 13903 Phone:(607) 723-1676

**Patient Name:** Diane Maloney  
**Height:**

**MRN #:** 7336  
**Weight:**

**Birth Year:**  
**Hypertension:** S1

Blood Pressure Averages

Blood Pressure Averages: Weekly

Blood Pressure Averages: Monthly

Month-Year	Systolic(n)	Diastolic(n)	Pulse(n)
11-2025	147 (31)	81 (31)	92 (31)

Blood Pressure Averages: Quarterly

Quarter-Year	Systolic(n)	Diastolic(n)	Pulse(n)
10-2025	147 (31)	81 (31)	92 (31)

Blood Pressure Averages: Yearly

Year	Systolic(n)	Diastolic(n)	Pulse(n)
2025	147 (31)	81 (31)	92 (31)

Diane Maloney	R.A. Ramanujan , M.D.	and to you	27-11-2025
R.A. Ramanujan , M.D.	Diane Maloney	Happy Thanksgiving!	26-11-2025
Diane Maloney	R.A. Ramanujan , M.D.	yes. thank you	17-11-2025
R.A. Ramanujan , M.D.	Diane Maloney	I have sent Rx	17-11-2025
R.A. Ramanujan , M.D.	Diane Maloney	GM Diane, Can you try one full pill daily. Best	17-11-2025
Diane Maloney	R.A. Ramanujan , M.D.	yes. i. ill come this pm	13-11-2025
null Lexi Matthias, LPN	Diane Maloney	HI DIANE, CAN YOU COME TO THE OFFICE BETWEEN 730AM AND 3 PM TO PICK UP SAMPLES OF A BP MEDICATION? ANY DAY IF FINE. LEXI	13-11-2025

Diane Maloney	R.A. Ramanujan , M.D.	yes	13-11-2025
Diane Maloney	R.A. Ramanujan , M.D.	yes	13-11-2025
R.A. Ramanujan , M.D.	Diane Maloney	BP is too high !	12-11-2025
R.A. Ramanujan , M.D.	Diane Maloney	BP is above desirable range. Would U consider some thing to bring this down ?	11-11-2025
R.A. Ramanujan , M.D.	Diane Maloney	GM Diane, Tom was back in ER. Glad to know he was not hospitalized. Please share your concern about demand to provide care at the time of discharge from NH. Best	10-11-2025
null Sue Ward	Diane Maloney	Medicare open enrollment has begun and will continue through December 7th. If you choose a plan we don't participate with, we will not be able to continue seeing you. As always, we require you to present your insurance card & copay at every visit, so remember to bring insurance card with you. The Medicare Advantage plans we participate with are AARP Medicare Aetna Medicare BCBS/Excellus Medicare CDCPHP Medicare Cigna/MVP Medicare Humana Medicare Medicare/Medicaid Railroad United Healthcare Medicare United Healthcare Dual Complete If you have any questions, please contact out office at 607-723-1676. We have sent a similar message through the patient portal as well. No response back through the checkmyvitals is needed. Hope to see you all next year DCA providers and staff	06-11-2025

## Systolic Variability Trends

1. **CV** –The coefficient of variation (CV) is the ratio of the standard deviation to the mean. The higher the coefficient of variation, the greater the level of dispersion around the mean, Units = mmHg.

2. **ARV** – Average real variability (ARV) is a method for measuring short-term, reading-to-reading, within-subject variability. It is defined as the average of the absolute differences between consecutive readings, Units = mmHg.

3. **SD** – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean), Units = mmHg.

## Diastolic Variability Trends

## Kalman Trends

1. **Mean(Arithmetic Mean)** – Mean is the average of a set of numbers

2. **SD** – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean).

3. **V** - Variance determines the spread of numbers.. It measures how far each number in the set is from the mean (average) and from every other number in the set.

## PSR

**PSR:** Pulse stiffening ratio (PSR) is the ratio between systolic and diastolic stiffness. It can be expressed as  $PSR = \text{[systolic stiffness]} / \text{[diastolic stiffness]}$ .

## HbA1c Trends

## Others Trends

1. **MAP:PP Ratio**- Mean Arterial Pressure : Pulse Pressure Ratio
2. **HASI**- Home arterial stiffening index
3. **HSASI**- Home Symmetric arterial stiffening index
4. **PP**- Pulse Pressure
5. **WIF or widening factor number**.  $WIF = K - 1 / \ln(K) - 1$ , where K is the variability ratio (  $K = \text{Systolic Std. Dev} / \text{Diastolic Std. Dev}$  )
6. **eIPP**- Elastic component of pulse pressure.  $eIPP = (PP - stPP)$
7. **stPP**- Stiffening component of pulse pressure.  $stPP = PP / (1 + WIF)$

## eCO graph

eCO (Estimated Cardiac Output) Normal range to be added 5 – 10 liters/minute

Units of eCO (Estimated Cardiac Output) – liters/minute

## eCBP graph

eCBP (Estimated Central Blood Pressure) normal range – 0 – 100 mmHg

1. Cardiac output scale is in liters/minute. Normal range at rest is 5-6 liters/min and (with activity goes up to 30 -35 liters/min)

2. Central mean BP is Squared, Mean radial artery BP/diastolic BP in mmHg. Scale in mmHg and range is in mmHg and the scale Should be between 0-50 50-100, 150 and 200 mmHg. No established normal at the moment.

## MAP graph

MAP -Mean arterial blood pressure.  $MAP = \text{Diastolic blood pressure} + 1/3(\text{Systolic blood pressure} - \text{Diastolic blood pressure})$

## Reference & Abbreviations

Guide to abbreviations and blood pressure, pulse and other Metrics.

<b>HBPM</b> -Home blood pressure measurement.	<b>HBS</b> -Home blood sugar
<b>PP</b> -Pulse pressure	<b>AP</b> -Average pulse
<b>BPV</b> -Blood pressure variability	<b>SV</b> -Systolic variability
<b>DV</b> -Diastolic variability	<b>PV</b> -Pulse variability
<b>ARV</b> -Average real variability	<b>CV</b> -Coefficient of variation %
<b>SD</b> -Standard deviation	<b>MAP</b> -Mean arterial blood pressure
<b>MAP:</b> PP Mean Arterial Pressure : Pulse Pressure	<b>HASI</b> -Home arterial stiffness index
<b>HSASI</b> -Home Symmetric arterial stiffness index	<b>Estimated CO</b> -Cardiac output [CO=(PPxHR)x.002]
<b>PSR Pulse stiffening ratio.</b> (PSR = SBP/DBP or slope of systolic BP/slope of diastolic BP)	

Estimated central blood pressure ECBP (ECBP = brachial MBP2/brachial DBP or ECBP = radial MBP2/radial DBP)

### Normal Ranges.

Systolic BP 110 – 120 mm Hg

Diastolic BP 70 – 80 mmHg

Pulse 60 - 100/min

Pulse pressure (PP) 40 mmHg (Low PP less than 25% of the systolic BP and high PP greater than 100 mm Hg)

Normal stroke volume (SV) 60 -100 ml

Cardiac output (CO) SV x pulse rate/min

Estimate Cardiac output = Stroke volume / m

Blood pressure variability; Not defined in USA. But desirable ranges ESH guidelines; Systolic day time BP less than 15 mmHg and Diastolic less than 7.9 mmHg and Weighted SD less than 12.8 mmHg for systolic

### Definitions.

MAP:PP ratio not defined.

Pulse stiffening ration; Not defined. Pulse pressure \* inverse log ( std. dev. systolic / std. dev. Diastolic) / (std. dev. systolic / std. dev. Diastolic) - 1 (Pulse pressure X ln (K)/(K-1) where K is systolic Sd /diastolic SD.)

Home arterial stiffness index; Not defined

Home arterial symmetric arterial index: Not defined.

Central blood pressure:Not defined
