

40 Mitchell Ave, Binghamton, NY 13903 Phone: (607) 723-1676

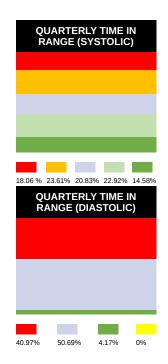

Patient Name: Dianne Resciniti

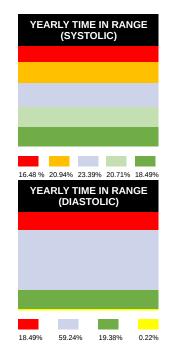

Height: 50.09

MRN #: 4412 Weight: 173 Birth Year: Hypertension: S1

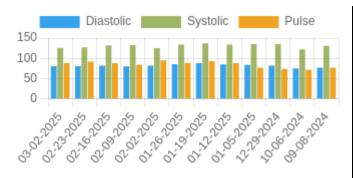

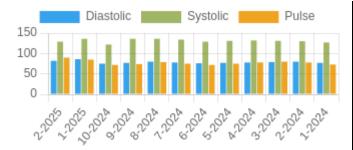

Blood Pressure Averages

Blood Pressure Averages: Weekly

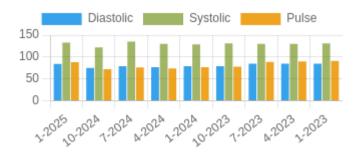

Week	Systolic(n)	Diastolic(n)	Pulse(n)
03-02-2025	126 (3)	81 (3)	89 (3)
02-23-2025	127 (8)	81 (8)	92 (8)
02-16-2025	132 (19)	82 (19)	88 (19)
02-09-2025	133 (16)	80 (16)	84 (16)
02-02-2025	125 (23)	82 (23)	95 (23)
01-26-2025	134 (21)	86 (21)	89 (21)
01-19-2025	137 (18)	88 (18)	93 (18)
01-12-2025	134 (12)	85 (12)	88 (12)
01-05-2025	135 (20)	84 (20)	77 (20)
12-29-2024	135 (4)	82 (4)	74 (4)
10-06-2024	122 (3)	75 (3)	72 (3)
09-08-2024	131 (5)	77 (5)	77 (5)

Blood Pressure Averages: Monthly

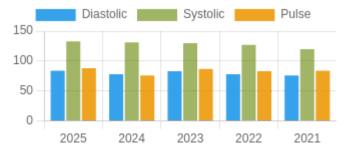

Month-Year	Systolic(n)	Diastolic(n)	Pulse(n)
2-2025	129 (69)	82 (69)	90 (69)
1-2025	136 (69)	86 (69)	85 (69)
10-2024	122 (3)	75 (3)	72 (3)
9-2024	136 (11)	77 (11)	74 (11)
8-2024	136 (24)	80 (24)	79 (24)
7-2024	134 (60)	78 (60)	75 (60)
6-2024	129 (67)	76 (67)	72 (67)
5-2024	131 (43)	77 (43)	75 (43)
4-2024	132 (51)	78 (51)	78 (51)
3-2024	131 (52)	79 (52)	80 (52)
2-2024	130 (70)	80 (70)	78 (70)
1-2024	127 (43)	77 (43)	73 (43)

Blood Pressure Averages: Quarterly

Quarter-Year	Systolic(n)	Diastolic(n)	Pulse(n)
1-2025	133 (138)	84 (138)	88 (138)
10-2024	122 (3)	75 (3)	72 (3)
7-2024	135 (95)	79 (95)	76 (95)
4-2024	130 (161)	77 (161)	74 (161)
1-2024	129 (165)	79 (165)	77 (165)
10-2023	131 (180)	79 (180)	78 (180)
7-2023	130 (134)	85 (134)	89 (134)
4-2023	130 (172)	85 (172)	90 (172)
1-2023	131 (64)	85 (64)	91 (64)

Blood Pressure Averages: Yearly

Year	Systolic(n)	Diastolic(n)	Pulse(n)
2025	133 (138)	84 (138)	88 (138)
2024	131 (424)	78 (424)	76 (424)
2023	130 (679)	83 (679)	87 (679)
2022	127 (865)	78 (865)	83 (865)
2021	120 (626)	76 (626)	84 (626)

Dianne Resciniti	R.A. Ramanujan , M.D.	hi Dr ram. today is a week since I went off the meds. the BP med I take if my BP is higher than 130. I didn't do BP this morning because I'm stressed over a Leo issue with his staff so not a true reading. I'll do tonight. I've been pooping for the last 3 days. which feels back to normal and I've been more hungry without the drugs but trying hard to stay with meat, cabbage, lettuce etc. I find myself wanting to forage but am trying very hard not to. I assume it's ok to go back on phentermine and toperimate tomorrow and last dose of ozympic on Sat. I'll try to get a weight tomorrow before coffee. thank you.	20-02-2025
R.A. Ramanujan	Dianne Resciniti	BP systolic is bel0w 130 mmHG HOLD.	13-02-2025

, M.D.			
Dianne Resciniti	R.A. Ramanujan , M.D.	do you want me to stay on the blood pressure med?	13-02-2025
R.A. Ramanujan , M.D.	Dianne Resciniti	*	13-02-2025
Dianne Resciniti	R.A. Ramanujan , M.D.	ok. thank you.	13-02-2025
R.A. Ramanujan , M.D.	Dianne Resciniti	Take a break from all the 3 for one week.	13-02-2025
Dianne Resciniti	R.A. Ramanujan , M.D.	hi. good morning. I believe I'm down to 180 ish on my scale but full of poop so it could be more. I'm not eating much. I don't like the feeling ozympic give me. the constipation and the feeling that whatever I ate just sits at the top of my stomach for 12 hours or more. I'd like to skip Saturdays dose of ozympic and see if just the phentermine and toperimate can hold off my appetite. also I'm not sleeping well so I'mnot sure what drug is to blame. that's not too much of an issue because I can get a nap in. I did poop just a little on wed and feel like I need to again but nothings happing and I don't want to force anything. I'm going in the right direction but it seems like it is taking longer this time to get the weight off than 6 years ago. that's ok.	
R.A. Ramanujan , M.D.	Dianne Resciniti	GM any change since 1/28 ???	13-02-2025

Systolic Variability Trends

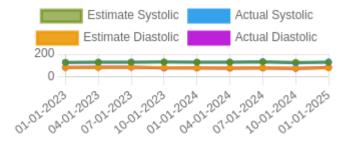

- **1. CV** –The coefficient of variation (CV) is the ratio of the standard deviation to the mean. The higher the coefficient of variation, the greater the level of dispersion around the mean, Units = mmHg.
- **2. ARV** Average real variability (ARV) is a method for measuring short-term, reading-to-reading, within-subject variability. It is defined as the average of the absolute differences between consecutive readings, Units = mmHg.
- **3. SD** Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean), Units = mmHg.

Diastolic Variability Trends

Kalman Trends

- **1.** Mean(Arithmetic Mean) Mean is the average of a set of numbers
- **2. SD** Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean).
- **3.** V- Variance determines the spread of numbers.. It measures how far each number in the set is from the mean (average) and from every other number in the set.

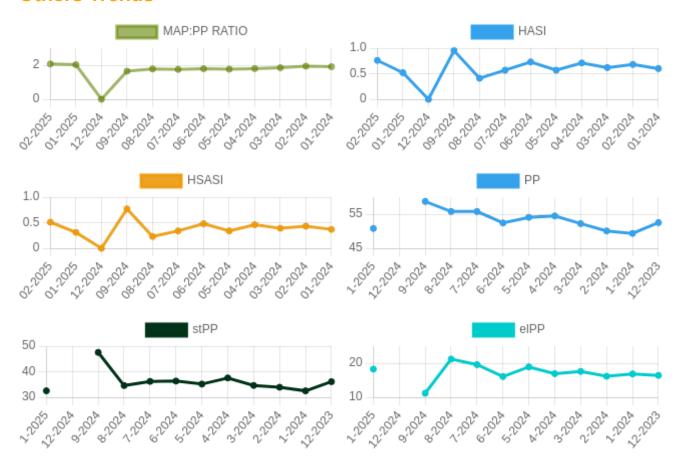

PSR

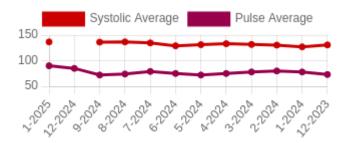

PSR: Pulse stiffening ratio (PSR) is the ratio between systolic and diastolic stiffness. It can be expressed as PSR = [systolic stiffness]/[diastolic stiffness].

HbA1c Trends

Others Trends

- 1. MAP:PP Ratio- Mean Arterial Pressure : Pulse Pressure Ratio
- 2. HASI- Home arterial stiffening index
- 3. HSASI- Home Symmetric arterial stiffening index
- 4. PP- Pulse Pressure
- **5. WIF or widening factor number. WIF** = K-1/In(K)-1, where K is the variability ratio (K = Systolic Std. Dev / Diastolic Std. Dev)
- 6. eIPP- Elastic component of pulse pressure. eIPP= (PP stPP)
- 7. stPP- Stiffening component of pulse pressure. stPP= PP/(1+ WIF)

eCO graph

eCO (Estimated Cardiac Output) Normal range to be added 5-10 liters/minute

Units of eCO (Estimated Cardiac Output) - liters/minute

eCBP graph

eCBP (Estimated Central Blood Pressure) normal range – 0 – 100 mmHg

- 1. Cardiac output scale is in liters/minute. Normal range at rest is 5-6 liters/min and (with activity goes up to 30 -35 liters/min)
- 2. Central mean BP is Squared, Mean radial artery BP/diastolic BP in mmHg. Scale in mmHg and range is in mmHg and the scale Should be between 0-50 50-100, 150 and 200 mmHg. No established normal at the moment.

MAP graph

MAP -Mean arterial blood pressure. MAP = Diastolic blood pressure + 1/3(Systolic blood pressure – Diastolic blood pressure)

Reference & Abbreviations

Guide to abbreviations and blood pressure, pulse and other Metrics.

HBPM -Homme blood pressure measurement.	HBS -Home blood sugar	
PP -Pulse pressure	AP -Average pulse	
BPV -Blood pressure variability	SV -Systolic variability	
DV -Diastolic variability	PV -Pulse variability	
ARV -Average real variability	CV -Coefficient of variation %	
SD -Standard deviation	MAP -Mean arterial blood pressure	
MAP: PP Mean Arterial Pressure : Pulse Pressure	HASI -Home arterial stiffness index	
HSASI -Home Symmetric arterial stiffness index	Estimated CO -Cardiac output [CO= (PPxHR)x.002]	
PSR Pulse stiffening ratio. (PSR = SBP/DBP or slope of systolic BP/slope of diastolic BP)		

Estimated central blood pressure ECBP (ECBP = brachial MBP2/brachial DBP or ECBP = radial MBP2/radial DBP)

Normal Ranges.

Systolic BP 110 - 120 mm Hg

Diastolic BP 70 - 80 mmHg

Pulse 60 - 100/min

Pulse pressure (PP) 40 mmHg (Low PP less than 25% of the systolic BP and high PP greater than 100 mm Hg)

Normal stroke volume (SV) 60 -100 ml

Cardiac output (CO) SV x pulse rate/min

Estimate Cardiac output = Stroke volume / m

Blood pressure variability; Not defined in USA. But desirable ranges ESH guidelines; Systolic day time BP less than 15 mmHg and Diastolic less than 7.9 mmHg and Weighted SD less than 12.8 mmHg for systolic

Definitions.

MAP:PP ratio not defined.

Pulse stiffening ration; Not defined. Pulse pressure * inverse log (std. dev. systolic / std. dev. Diastolic) / (std. dev. systolic / std. dev. Diastolic) - 1 (Pulse pressure X In (K)/(K-1) where K is systolic Sd /diastolic SD.)

Home arterial stiffness index; Not defined

Home arterial symmetric arterial index: Not defined.

Central blood pressure: Not defined
