Blood Pressure Averages

Blood Pressure Averages: Weekly

Week	Systolic(n)	Diastolic(n)	Pulse(n)
06-30-2024	144 (1)	102 (1)	92 (1)
05-26-2024	137 (4)	97 (4)	122 (4)
05-19-2024	120 (5)	79 (5)	85 (5)
05-12-2024	149 (4)	101 (4)	83 (4)

Blood Pressure Averages: Monthly

Month-Year	Systolic(n)	Diastolic(n)	Pulse(n)
6-2024	133 (3)	94 (3)	124 (3)
5-2024	134 (10)	90 (10)	88 (10)

Blood Pressure Averages: Quarterly

Quarter-Year	Systolic(n)	Diastolic(n)	Pulse(n)
4-2024	134 (13)	91 (13)	96 (13)

Blood Pressure Averages: Yearly

Year	Systolic(n)	Diastolic(n)	Pulse(n)
2024	134 (13)	91 (13)	96 (13)

Blood Sugar Averages

Month-Year	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
06-2024				96(1)	87(1)		
05-2024	94(1)		97(1)		123(1)	110(1)	129(1)

Year	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
01-01-2024	94(1)		97(1)	96(1)	105(2)	110(1)	129(1)

R.A. Ramanujan , M.D.	LAURA HULBURT	🙏	08-07-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	ok	08-07-2024
R.A. Ramanujan , M.D.	LAURA HULBURT	Will contact you soon.	08-07-2024

LAURA HULBURT	R.A. Ramanujan , M.D.	okay so what are we going to do about it	08-07-2024
R.A. Ramanujan , M.D.	LAURA HULBURT	Yes will be in consideration.	08-07-2024
R.A. Ramanujan , M.D.	LAURA HULBURT	Will check thyroid in 3 04 weeks and go to the next level.	24-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	i thought we were going to do weight loss medication , like something that was more towards weight loss	23-06-2024
R.A. Ramanujan , M.D.	LAURA HULBURT	GM Laura, I will call you today. Best	20-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	is their a way to be seen sooner then the 25th im having anxiety about what my blood work means	19-06-2024
null Lexi Matthias, LPN	LAURA HULBURT	TODAY IS THE LAST DAY FOR VOTING. I'M SORRY THE LINK DOESN'T WORK, BUT PLEASE COPY AND PASTE INTO YOUR WEB BROWSER. TO VOTE FOR DR. RAM. THANK YOU. LEXI	10-06-2024
null Lexi Matthias, LPN	LAURA HULBURT	APPT CANCELED. WE WILL SEE YOU ON THE 18TH. LEXI	10-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	alright will you cancel my appointment for tomorrow then	10-06-2024
R.A. Ramanujan , M.D.	LAURA HULBURT	Skip tomorrow. Will arrange for every thing when you see Amy.	10-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	whats my visit tomorrow for and why do i need to see a dietitian next week	10-06-2024
R.A. Ramanujan , M.D.	LAURA HULBURT	Laura will be calling you to set up. Best	06-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	weight as of today 333lbs	06-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	what is the plan now that my blood work was done	06-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	okay	04-06-2024
R.A. Ramanujan , M.D.	LAURA HULBURT	Hi Laura. Will call with all the results soon.	04-06-2024
LAURA HULBURT	R.A. Ramanujan , M.D.	i believe all the labs have came back can you tell me what they mean and why stuff is low and keeps being low	04-06-2024

Systolic Variability Trends

1. CV –The coefficient of variation (CV) is the ratio of the standard deviation to the mean. The higher the coefficient of variation, the greater the level of dispersion around the mean, Units = mmHg.

2. ARV – Average real variability (ARV) is a method for measuring short-term, reading-to-reading, within-subject variability. It is defined as the average of the absolute

differences between consecutive readings, Units = mmHg.

3. SD – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean), Units = mmHg.

Diastolic Variability Trends

Kalman Trends

1. Mean(Arithmetic Mean) – Mean is the average of a set of numbers

2. SD – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean).

3. V- Variance determines the spread of numbers.. It measures how far each number in the set is from the mean (average) and from every other number in the set.

PSR

PSR: Pulse stiffening ratio (PSR) is the ratio between systolic and diastolic stiffness. It can be expressed as $PSR = \frac{[systolic\ stiffness]}{[diastolic\ stiffness]}$.

HbA1c Trends

Estimated HbA1c - eHbA1c

Others Trends

1. **MAP:PP Ratio**- Mean Arterial Pressure : Pulse Pressure Ratio

2. **HASI**- Home arterial stiffening index

3. **HSASI**- Home Symmetric arterial stiffening index

4. **PP**- Pulse Pressure

5. **WIF or widening factor number. WIF** = $K-1/\ln(K)-1$, where K is the variability ratio ($K = \text{Systolic Std. Dev} / \text{Diastolic Std. Dev}$)

6. **eIPP**- Elastic component of pulse pressure. $eIPP = (PP - stPP)$

7. **stPP**- Stiffening component of pulse pressure. $stPP = PP / (1 + WIF)$

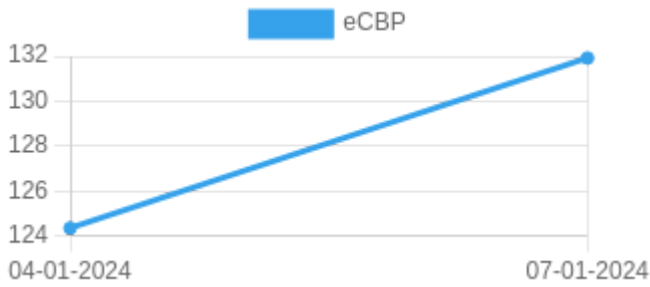

eCO graph

eCO (Estimated Cardiac Output) Normal range to be added 5 – 10 liters/minute

Units of eCO (Estimated Cardiac Output) – liters/minute

eCBP graph

eCBP (Estimated Central Blood Pressure) normal range – 0 – 100 mmHg

1. Cardiac output scale is in liters/minute. Normal range at rest is 5-6 liters/min and (with activity goes up to 30 -35 liters/min)

2. Central mean BP is Squared, Mean radial artery BP/diastolic BP in mmHg. Scale in mmHg and range is in mmHg and the scale Should be between 0-50 50-100, 150 and 200 mmHg. No established normal at the moment.

MAP graph

MAP -Mean arterial blood pressure. MAP = Diastolic blood pressure + 1/3(Systolic blood pressure – Diastolic blood pressure)

Reference & Abbreviations

Guide to abbreviations and blood pressure, pulse and other Metrics.

HBPM -Home blood pressure measurement.	HBS -Home blood sugar
PP -Pulse pressure	AP -Average pulse
BPV -Blood pressure variability	SV -Systolic variability
DV -Diastolic variability	PV -Pulse variability
ARV -Average real variability	CV -Coefficient of variation %
SD -Standard deviation	MAP -Mean arterial blood pressure
MAP: PP Mean Arterial Pressure : Pulse Pressure	HASI -Home arterial stiffness index
HSASI -Home Symmetric arterial stiffness index	Estimated CO -Cardiac output [CO= (PPxHR)x.002]
PSR Pulse stiffening ratio. (PSR = SBP/DBP or slope of systolic BP/slope of diastolic BP)	

Estimated central blood pressure ECBP (ECBP = brachial MBP2/brachial DBP or ECBP = radial MBP2/radial DBP)

Normal Ranges.

Systolic BP 110 – 120 mm Hg

Diastolic BP 70 – 80 mmHg

Pulse 60 - 100/min

Pulse pressure (PP) 40 mmHg (Low PP less than 25% of the systolic BP and high PP greater than 100 mm Hg)

Normal stroke volume (SV) 60 -100 ml

Cardiac output (CO) SV x pulse rate/min

Estimate Cardiac output = Stroke volume / m

Blood pressure variability; Not defined in USA. But desirable ranges ESH guidelines; Systolic day time BP less than 15 mmHg and Diastolic less than 7.9 mmHg and Weighted SD less than 12.8 mmHg for systolic

Definitions.

MAP:PP ratio not defined.

Pulse stiffening ration; Not defined. Pulse pressure * inverse log (std. dev. systolic / std. dev. Diastolic) / (std. dev. systolic / std. dev. Diastolic) - 1 (Pulse pressure X ln (K)/(K-1) where K is systolic Sd /diastolic SD.)

Home arterial stiffness index; Not defined

Home arterial symmetric arterial index: Not defined.

Central blood pressure:Not defined
