

40 Mitchell Ave, Binghamton, NY 13903 Phone:(607) 723-1676

Patient Name: Lucretia Hesco  
Height:

MRN #: 8351  
Weight:

Birth Year:  
Hypertension: S1

Blood Pressure Averages

Blood Pressure Averages: Weekly

Week	Systolic(n)	Diastolic(n)	Pulse(n)
------	-------------	--------------	----------

Blood Pressure Averages: Monthly

Blood Pressure Averages: Quarterly

Quarter-Year	Systolic(n)	Diastolic(n)	Pulse(n)
7-2025	0 (0)	0 (0)	0 (0)

Blood Pressure Averages: Yearly

Year	Systolic(n)	Diastolic(n)	Pulse(n)
2025	0 (0)	0 (0)	0 (0)

Blood Sugar Averages

Week	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
09-13-2025	139(1)						
09-05-2025					143(2)		
08-28-2025	148(1)					137(1)	139(1)

Month-Year	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
09-2025	139(1)				143(2)		
08-2025	133(8)	116(1)		184(3)	151(2)	143(4)	195(3)
07-2025		263(1)				239(1)	

Year	Before breakfast	2 hours after breakfast	Before lunch	2 hours after lunch	Before dinner	2 hours after dinner	Bedtime
01-01-2025	133(9)	189(2)		184(3)	147(4)	162(5)	195(3)

Sender	Receiver	Messege	Date&Time
R.A. Ramanujan , M.D.	Lucretia Hesco	No change from before.	13-09-2025
Lucretia Hesco	R.A. Ramanujan , M.D.	Guthrie yesterday. I don't see the results yet either.	12-09-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	Where did you have the ECHO test ?? (Do not see any thing at UHS or Guthrie)	12-09-2025
Lucretia Hesco	R.A. Ramanujan , M.D.	I'm not doing a stress test. I did just have another echo today,waiting on results.	11-09-2025

R.A. Ramanujan , M.D.	Lucretia Hesco	GM, reviewed the chart and last ECHO from 7/15. Will update with your stress test results and explore action plan. Alert your outcome. Best	11-09-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	Thanks for the input.	18-08-2025
Lucretia Hesco	R.A. Ramanujan , M.D.	I was tested for an infection but it was negative.	18-08-2025
Lucretia Hesco	R.A. Ramanujan , M.D.	No. But symptoms have improved since I stopped taking Jardiance.	18-08-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	That is due to yeast infection. R U taking any med ??	18-08-2025
Lucretia Hesco	R.A. Ramanujan , M.D.	If you really want to know 🙄. I had a swollen and irritated vagina, lasted for weeks.	18-08-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	Hi, What was the side effect. Would like that in record and let others be on alert.	18-08-2025
Lucretia Hesco	R.A. Ramanujan , M.D.	I had terrible side effects from Jardiance.	18-08-2025
Mr. Anu Banerjee	Lucretia Hesco	Thank you for submitting your readings diligently and helping us take care of your health. Keep up the great work. We wanted to let you know that your recent customized PDF Report is now available from the app with your latest vital sign data. Thank you again.	18-08-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	Any side effect from Jardiance ??	18-08-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	GM Lucretia, Any thing new ??	12-08-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	What was blood sugar this morning ??	02-08-2025
Lucretia Hesco	R.A. Ramanujan , M.D.	I have new ones I can put on. I was just surprised it only lasted one day.	02-08-2025
R.A. Ramanujan , M.D.	Lucretia Hesco	No you need a new one. Time frame you can be reached ???	01-08-2025

## Systolic Variability Trends

1. **CV** –The coefficient of variation (CV) is the ratio of the standard deviation to the mean. The higher the coefficient of variation, the greater the level of dispersion around the mean, Units = mmHg.

2. **ARV** – Average real variability (ARV) is a method for measuring short-term, reading-to-reading, within-subject variability. It is defined as the average of the absolute differences between consecutive readings, Units = mmHg.

3. **SD** – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean), Units = mmHg.

## Diastolic Variability Trends

### Kalman Trends

1. **Mean(Arithmetic Mean)** – Mean is the average of a set of numbers
2. **SD** – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean).
3. **V-** Variance determines the spread of numbers.. It measures how far each number in the set is from the mean (average) and from every other number in the set.

### PSR

**PSR:** Pulse stiffening ratio (PSR) is the ratio between systolic and diastolic stiffness. It can be expressed as  $PSR = [\text{systolic stiffness}]/[\text{diastolic stiffness}]$ .

### HbA1c Trends

Estimated HbA1c - eHbA1c

### Others Trends

1. **MAP:PP Ratio-** Mean Arterial Pressure : Pulse Pressure Ratio
2. **HASI-** Home arterial stiffening index
3. **HSASI-** Home Symmetric arterial stiffening index
4. **PP-** Pulse Pressure
5. **WIF or widening factor number.**  $WIF = K - 1/\ln(K) - 1$ , where K is the variability ratio (  $K = \text{Systolic Std. Dev} / \text{Diastolic Std. Dev}$ )
6. **eIPP-** Elastic component of pulse pressure.  $eIPP = (PP - stPP)$
7. **stPP-** Stiffening component of pulse pressure.  $stPP = PP/(1 + WIF)$

### eCO graph

eCO (Estimated Cardiac Output) Normal range to be added 5 – 10 liters/minute

Units of eCO (Estimated Cardiac Output) – liters/minute

## eCBP graph

eCBP (Estimated Central Blood Pressure) normal range – 0 – 100 mmHg

1. Cardiac output scale is in liters/minute. Normal range at rest is 5-6 liters/min and (with activity goes up to 30 -35 liters/min)

2. Central mean BP is Squared, Mean radial artery BP/diastolic BP in mmHg. Scale in mmHg and range is in mmHg and the scale Should be between 0-50 50-100, 150 and 200 mmHg. No established normal at the moment.

## MAP graph

MAP -Mean arterial blood pressure.  $MAP = \text{Diastolic blood pressure} + \frac{1}{3}(\text{Systolic blood pressure} - \text{Diastolic blood pressure})$

## Reference & Abbreviations

Guide to abbreviations and blood pressure, pulse and other Metrics.

<b>HBPM</b> -Home blood pressure measurement.	<b>HBS</b> -Home blood sugar
<b>PP</b> -Pulse pressure	<b>AP</b> -Average pulse
<b>BPV</b> -Blood pressure variability	<b>SV</b> -Systolic variability
<b>DV</b> -Diastolic variability	<b>PV</b> -Pulse variability
<b>ARV</b> -Average real variability	<b>CV</b> -Coefficient of variation %
<b>SD</b> -Standard deviation	<b>MAP</b> -Mean arterial blood pressure
<b>MAP:</b> PP Mean Arterial Pressure : Pulse Pressure	<b>HASI</b> -Home arterial stiffness index
<b>HSASI</b> -Home Symmetric arterial stiffness index	<b>Estimated CO</b> -Cardiac output [CO= (PPxHR)x.002]
<b>PSR Pulse stiffening ratio.</b> (PSR = SBP/DBP or slope of systolic BP/slope of diastolic BP)	

Estimated central blood pressure ECBP (ECBP = brachial MBP2/brachial DBP or ECBP = radial MBP2/radial DBP)

### Normal Ranges.

Systolic BP 110 – 120 mm Hg

Diastolic BP 70 – 80 mmHg

Pulse 60 - 100/min

Pulse pressure (PP) 40 mmHg (Low PP less than 25% of the systolic BP and high PP greater than 100 mm Hg)

---

Normal stroke volume (SV) 60 -100 ml

Cardiac output (CO) SV x pulse rate/min

Estimate Cardiac output = Stroke volume / m

Blood pressure variability; Not defined in USA. But desirable ranges ESH guidelines; Systolic day time BP less than 15 mmHg and Diastolic less than 7.9 mmHg and Weighted SD less than 12.8 mmHg for systolic

#### Definitions.

MAP:PP ratio not defined.

Pulse stiffening ration; Not defined. Pulse pressure \* inverse log ( std. dev. systolic / std. dev. Diastolic) / (std. dev. systolic / std. dev. Diastolic) - 1 (Pulse pressure X ln (K)/(K-1) where K is systolic Sd /diastolic SD.)

Home arterial stiffness index; Not defined

Home arterial symmetric arterial index: Not defined.

Central blood pressure:Not defined
