## Blood Pressure Averages

### Blood Pressure Averages: Weekly

Week	Systolic(n)	Diastolic(n)	Pulse(n)
03-02-2025	121 (2)	74 (2)	80 (2)
02-23-2025	111 (1)	66 (1)	84 (1)
02-16-2025	127 (1)	67 (1)	87 (1)
11-17-2024	105 (1)	73 (1)	78 (1)
09-15-2024	122 (4)	76 (4)	88 (4)
09-08-2024	100 (2)	60 (2)	81 (2)

### Blood Pressure Averages: Monthly

Month-Year	Systolic(n)	Diastolic(n)	Pulse(n)
2-2025	127 (1)	67 (1)	87 (1)
11-2024	105 (1)	73 (1)	78 (1)
9-2024	115 (6)	70 (6)	85 (6)
8-2024	120 (1)	67 (1)	76 (1)

7-2024	109 (5)	66 (5)	85 (5)
6-2024	124 (2)	79 (2)	85 (2)
5-2024	111 (2)	67 (2)	92 (2)
4-2024	110 (4)	67 (4)	84 (4)
3-2024	136 (21)	78 (21)	86 (21)
2-2024	163 (2)	89 (2)	83 (2)

### Blood Pressure Averages: Quarterly

Quarter-Year	Systolic(n)	Diastolic(n)	Pulse(n)
1-2025	127 (1)	67 (1)	87 (1)
10-2024	105 (1)	73 (1)	78 (1)
7-2024	113 (12)	68 (12)	85 (12)
4-2024	114 (8)	70 (8)	86 (8)
1-2024	139 (23)	79 (23)	85 (23)

### Blood Pressure Averages: Yearly

Year	Systolic(n)	Diastolic(n)	Pulse(n)
2025	127 (1)	67 (1)	87 (1)
2024	126 (44)	74 (44)	85 (44)
2022	148 (13)	83 (13)	87 (13)

### Chat

Sender	Receiver	Message	Date&Time
null Sue Ward	Margaret Gates	Yes we have openings that day right now. Please call as soon as possible to get the appointment booked 607-723-1676	05-03-2025
Margaret Gates	R.A. Ramanujan , M.D.	otherwise anything any other day will need to be 4:30 or after	04-03-2025
Margaret Gates	R.A. Ramanujan , M.D.	any available appts on March 20?	04-03-2025
R.A. Ramanujan , M.D.	Margaret Gates	👉	04-03-2025
null Sue Ward	Margaret Gates	Morning Margaret we still have not received a call to set up an appointment. Can you call us now 607-723-1676	28-02-2025
Margaret Gates	R.A. Ramanujan , M.D.	if so can you please send in to cvs ?	27-02-2025
Margaret Gates	R.A. Ramanujan , M.D.	should this months mounjaro strength be increased from 7.5?	27-02-2025
null Sue Ward	Margaret Gates	We have not seen you since last June. Nnacy needs to see you. She will send a small supply of medication today. Sue	26-02-2025
null Sue Ward	Margaret Gates	Morning Margaret can you call the office for an appointment?	26-02-2025
Margaret Gates	R.A. Ramanujan , M.D.	can you please also send in a refill for albuterol?	25-02-2025
Margaret Gates	R.A. Ramanujan , M.D.	ok will do ..	19-02-2025

R.A. Ramanujan , M.D.	Margaret Gates	GM, Please consider lab tests soon and share your BP please	18-02-2025
Margaret Gates	R.A. Ramanujan , M.D.	please send in a prescription for mounjaro to cvs .. thank you!	17-02-2025
R.A. Ramanujan , M.D.	Margaret Gates	You can get much cheaper kind by mail order from CANADA. Check cheap RX web site	06-02-2025
Margaret Gates	R.A. Ramanujan , M.D.	good morning.. is there a generic equivalent to jardiance? if so can my prescription be switched to that?	06-02-2025

## Systolic Variability Trends

**1. CV** –The coefficient of variation (CV) is the ratio of the standard deviation to the mean. The higher the coefficient of variation, the greater the level of dispersion around the mean, Units = mmHg.

**2. ARV** – Average real variability (ARV) is a method for measuring short-term, reading-to-reading, within-subject variability. It is defined as the average of the absolute differences between consecutive readings, Units = mmHg.

**3. SD** – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean), Units = mmHg.

## Diastolic Variability Trends

## Kalman Trends

**1. Mean(Arithmetic Mean)** – Mean is the average of a set of numbers

**2. SD** – Standard deviation is a statistical measurement of variability. It measures how much variation there is from the average (mean).

**3. V-** Variance determines the spread of numbers.. It measures how far each number in the set is from the mean (average) and from every other number in the set.

## PSR

**PSR:** Pulse stiffening ratio (PSR) is the ratio between systolic and diastolic stiffness. It can be expressed as  $PSR = \frac{[systolic\ stiffness]}{[diastolic\ stiffness]}$ .

## HbA1c Trends

## Others Trends

1. **MAP:PP Ratio**- Mean Arterial Pressure : Pulse Pressure Ratio

2. **HASI**- Home arterial stiffening index

3. **HSASI**- Home Symmetric arterial stiffening index

4. **PP**- Pulse Pressure

5. **WIF or widening factor number. WIF** =  $K-1/\ln(K)-1$ , where K is the variability ratio (  $K = \text{Systolic Std. Dev} / \text{Diastolic Std. Dev}$  )

6. **eIPP**- Elastic component of pulse pressure.  $eIPP = (PP - stPP)$

7. **stPP**- Stiffening component of pulse pressure.  $stPP = PP / (1 + WIF)$

## eCO graph

eCO (Estimated Cardiac Output) Normal range to be added 5 – 10 liters/minute

Units of eCO (Estimated Cardiac Output) – liters/minute

## eCBP graph

eCBP (Estimated Central Blood Pressure) normal range – 0 – 100 mmHg

1. Cardiac output scale is in liters/minute. Normal range at rest is 5-6 liters/min and (with activity goes up to 30 -35 liters/min)

2. Central mean BP is Squared, Mean radial artery BP/diastolic BP in mmHg. Scale in mmHg and range is in mmHg and the scale Should be between 0-50 50-100, 150 and 200 mmHg. No established normal at the moment.

## MAP graph

MAP -Mean arterial blood pressure.  $MAP = Diastolic\ blood\ pressure + \frac{1}{3}(Systolic\ blood\ pressure - Diastolic\ blood\ pressure)$

## Reference & Abbreviations

Guide to abbreviations and blood pressure, pulse and other Metrics.

<b>HBPM</b> -Home blood pressure measurement.	<b>HBS</b> -Home blood sugar
<b>PP</b> -Pulse pressure	<b>AP</b> -Average pulse
<b>BPV</b> -Blood pressure variability	<b>SV</b> -Systolic variability
<b>DV</b> -Diastolic variability	<b>PV</b> -Pulse variability
<b>ARV</b> -Average real variability	<b>CV</b> -Coefficient of variation %
<b>SD</b> -Standard deviation	<b>MAP</b> -Mean arterial blood pressure
<b>MAP:</b> PP Mean Arterial Pressure : Pulse Pressure	<b>HASI</b> -Home arterial stiffness index
<b>HSASI</b> -Home Symmetric arterial stiffness index	<b>Estimated CO</b> -Cardiac output [CO= (PPxHR)x.002]
<b>PSR Pulse stiffening ratio.</b> (PSR = SBP/DBP or slope of systolic BP/slope of diastolic BP)	

Estimated central blood pressure ECBP (ECBP = brachial MBP2/brachial DBP or ECBP = radial MBP2/radial DBP)

### Normal Ranges.

---

Systolic BP 110 – 120 mm Hg

Diastolic BP 70 – 80 mmHg

Pulse 60 - 100/min

Pulse pressure (PP) 40 mmHg (Low PP less than 25% of the systolic BP and high PP greater than 100 mm Hg)

Normal stroke volume (SV) 60 -100 ml

Cardiac output (CO) SV x pulse rate/min

Estimate Cardiac output = Stroke volume / m

Blood pressure variability; Not defined in USA. But desirable ranges ESH guidelines; Systolic day time BP less than 15 mmHg and Diastolic less than 7.9 mmHg and Weighted SD less than 12.8 mmHg for systolic

### Definitions.

MAP:PP ratio not defined.

Pulse stiffening ration; Not defined. Pulse pressure \* inverse log ( std. dev. systolic / std. dev. Diastolic) / (std. dev. systolic / std. dev. Diastolic) - 1 (Pulse pressure X ln (K)/(K-1) where K is systolic Sd /diastolic SD.)

Home arterial stiffness index; Not defined

Home arterial symmetric arterial index: Not defined.

Central blood pressure:Not defined
